Managed Services provide you access to both leading technology and the expertise of NU-Telecom's experienced team, while saving you time and money. Call today to see how NU-Telecom's Managed Services can help your business succeed.

Hosted Microsoft® Exchange

To stay competitive in today's marketplace, businesses need to find an innovative way to stay ahead of the competition. Partner with NU-Telecom to provide the best tools for your employees to help them be as productive and efficient as possible.

NU-Telecom's Hosted Microsoft® Exchange increases your employees' performance by improving their collaboration and communication online with:

- Business class email including shared calendars and contacts
- Access to email from anywhere
- Ability to synchronize mobile devices (Android, iPhone/iPad, BlackBerry, or Windows Mobile Devices)

Flexible storage and mailbox options are available to fit your needs. Hosted Microsoft® Exchange gives you all of this and more with lower cost of entry, ease of development, and full management and support.

On-Line File Back Up & On-Line File Storage

Computers are vulnerable to hard drive crashes, virus attacks, theft and natural disasters which can cause your valuable data to be lost in an instant. NU-Telecom's On-Line Back Up and On-Line File Storage provide a simple and safe way to store your important data.

- On-Line Back Up systematically backs up your data and stores it in a secure, centralized location for safekeeping, so that in the event of a disaster you can have peace of mind knowing your data is still retrievable.
- In addition to protecting your data, On-Line File Storage allows you immediate access to your secured data from an Internet connection at anytime from anywhere, giving your business a distinct competitive advantage.

Web Hosting

Whether it is simple hosting for a web presence or advanced hosting to conduct your business, NU-Telecom supports multiple platforms and languages to meet your requirements. With NU-Telecom web hosting, you'll realize convenience at a low cost for hardware, software, infrastructure and maintenance.

The following services are also available with Web Hosting:

- Domain Registration Renewals
- Spam protection
- eCommerce
- Email forwarding
- DNS Domain Hosting
- SQL Hosting (Microsoft SQL or MySQL)
- POP Email
- Cold Fusion Hosting

Web Design

Make the best impression possible with a website designed by NU-Telecom's TechTeam. We'll work together with you beginning with our consultation process to ensure that your website will create the image you want and will meet your goals.

Static IP Service

Get more from your Internet connection with Static IP Service from NU-Telecom. A Static IP is a permanent address that remains associated with a single computer over an extended period of time. You can now have control over your network for such things as connecting to a Virtual Private Network (VPN) or allowing remote access.

Static IP addresses are available for both residential and business customers with the following Internet options:

- DSL
- Dedicated Circuit (T1 or Ethernet)
- Wireless Internet

SharePoint

Improve collaboration and communication of your business by streamlining access to data with NU-Telecom's SharePoint, a web-based intranet. The Microsoft™ platform allows groups to set up a secure, centralized location for document sharing where employees can collaborate with team members, find organizational resources, manage content and workflow, and use other tools for making quicker, better informed decisions.

Business Hosted Microsoft™ Lync

Keep your employees connected with Business Hosted Microsoft Lync from NU-Telecom. Microsoft™ Lync (previously Microsoft Office Communications Server or OCS) is a real-time communications server that is most commonly used for instant messaging, file transfer, desktop sharing and multiparty voice and video calling within an organization. It's interactive, easy to use, and accessible from anywhere!

Dedicated VM Servers

Let NU-Telecom host your server with our dedicated virtual machine (VM) servers. You will have full control over the administration of your server, including the operating systems, hardware, and more. Plus, you can have peace of mind knowing that your business files and documents will be protected if you have an unfortunate fire or disaster at your office.

Disaster Recovery

We all hope that we never have to face a true disaster in our lifetime, but it is important to be prepared in case the worst should happen. NU-Telecom's Disaster Recovery plan protects all of your important files and documents by duplicating everything on your server and storing it on our server. If a disaster hits, you can feel assured that your server can be restored quickly so that your business operations are not impacted.

Managed Security

You lock your doors each night to protect your office building, but are you also securing your electronic files? With the many risks associated with email and other electronic communications, it is important to protect your system with firewalls, virus scanners, and spam blockers. Let NU-Telecom assist you with building an electronic security gate to protect your systems from the dangers of online threats.

Block of Time

Block of Time allows you to purchase TechTeam computer services at a discounted rate, in increments to fit your business' needs.
